The 1942 edition of the Canada Year Book will be available for distribution early in October. The volume shows a slight reduction in size this year although necessary material on the economic effects of the War has had to be expanded considerably. To provide for this the standard textual analysis has been cut wherever possible without impairing the essential balance between chapters. Special material showing the effects of the War on the Canadian Economy appear in the chapters concerned with: manufactures, external trade, prices, agriculture, forestry, mines and minerals, transportation and immigration. The important subjects of labour, public finance, currency and banking and internal trade have also been directly related to the War Effort.

An expanded article on the evolution down to Confederation, another dealing with nuptiality and fertility in Canada and a third on the subject of co-operation in Canada, have been contributed by authorities on these different subjects.

The usual thorough-going revision of all sections of the Year Book has been carried out. This year it has been possible, through the courtesy of the Under Secretary of State and by the use of plates prepared for other publications, to include several additional lithographed maps in the Year Book. The Year Book is offered to the public at the price of \$1.50 per copy, which covers merely the paper and press work involved. A limited number of paper-bound copies will be made available to bona fide students and teachers at 50 cents each. Applications for the regular edition should be made to the King's Printer, Ottawa, but requests for the paper-bound edition should be directed to the Dominion Statistician, Dominion Bureau of Statistics, Ottawa.

### MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. XVII

OTTAWA, SEPTEMBER, 1942

No. 9

Dominion Statistician: S. A. Cudmore, M.A. (Oxon.), F.S.S., F.R.S.C. Chief, Business Statistics Branch: Sydney B. Smith, M.A.

#### ECONOMIC CONDITIONS IN AUGUST

Five of the six major factors indicating the trend of economic conditions remained comparatively steady during the first eight months of the present year. The exception was the deposit liabilities of the chartered banks, which advanced sharply during the early months of the year followed by a subsequent reaction. The changes in August were of minor proportions, the speculative factors and wholesale prices showing reaction. Minor gains were recorded in business activity, high-grade bond prices and bank deposits. Common stock prices and speculative trading are now fluctuating considerably below the line of inter-war trend. The index of Dominion bond prices has been above the trend since the beginning of 1941. A wide disparity above the trend of that period has been recorded by wholesale prices, business operations and deposit liabilities.

The high level of productive operations in Canada is indicated by the index of employment. A marked gain has been shown during the elapsed portion of the present year over the standing in 1941. The seasonally adjusted indexes since the beginning of the year have shown a relatively steady performance

suggesting that further advances will be of less spectacular character.

The amount of cheque transactions is an excellent indicator of economic activity. The total rose 14·2 p.c. in the first eight months of the present year over the same period of 1941. It is anticipated that the forthcoming Dominion loan will occasion an even greater increase before the end of the year. Cheques cashed in August were \$3,480 million against \$3,150 million in August last year.

It was recently announced that the peak of war production will be reached in the early months of next year. The greatest problem in war production today is material shortages with the labour problem second. The material shortage is acute and sharp curtailment of production for civilian needs is in prospect.

In the early stages of Canada's industrial war expansion there was heavy building activity. Construction of air stations for the Commonwealth Air Training Plan is now practically completed and industrial building has also passed its maximum.

Agriculture

Estimated farm cash income during the first half of 1941 was about \$399 million, substantially in excess of any comparable period since the beginning of the war. The greatest percentage of farm cash incomes are usually received during the last six months of the year when marketings of grain and livestock are heaviest. This year record yields of grain and further expansion in livestock production may again be expected to play an important part in the last six months. Income from wheat, however, will depend largely on the volume of deliveries which will be possible in the light of the acute storage situation. During the first six months of the present year, cash income was placed at \$399 million against \$343 million in 1941 and about \$259 million in 1940.

Canada's total wheat production in 1942 was placed at an all-time record level of 615 million bushels. The total is almost double the 311.8 million bushels produced in 1941 and exceeds by 48.5 million bushels the preceding record crop of 566.7 million harvested in 1928. Feed grain supplies for Canada as a whole are now the largest in history with a record production of oats and barley accompanying the largest crop of wheat. Considering the Prairie Provinces as a whole, the wheat crop is the largest on record, both in yield and production. The average yield is calculated at 28.4 bushels as compared with the previous record of 26 bushels in 1915. The 1942 production estimated at 587 million bushels exceeds by 42.4 million the previous record production of 544.6 million bushels harvested in 1928.

### NUMBERS AND RATES OF REMUNERATION OF EMPLOYEES

CANADIAN ENTERPRISE

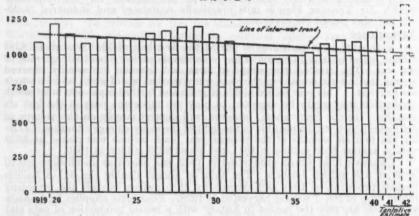

EXCLUDING ARMED FORCES AND NO PAYS

#### DOLLARS

### RATES

Wheat stocks in store were 399.8 million bushels in the week of September 11, compared with 471.2 million bushels in the same week of last year. ketings in the three Prairie Provinces for the six weeks ended September 11, were 8.5 million bushels against 31.2 million in the same period of 1941.

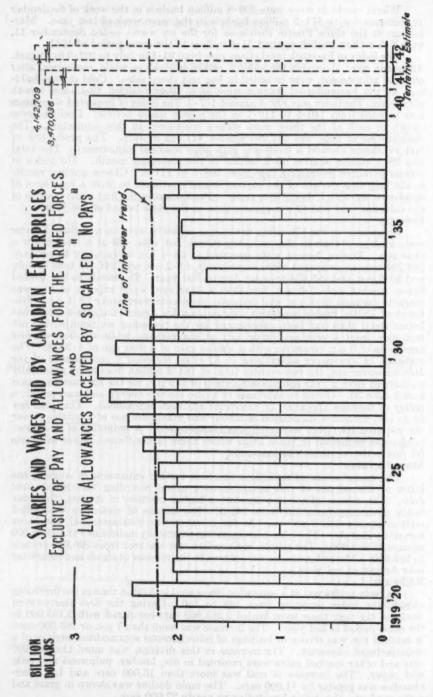

The index of livestock marketings rose from 93.4 in July to 102.9 in August. Advances were shown in the sale of cattle and calves while recessions, after seasonal adjustment, were recorded in hog and sheep sales. Cold storage holdings at the beginning of August were at a lower position than one month previously. The index was  $129\cdot 8$  against  $137\cdot 3$ . The index of inspected slaughterings receded from 140.4 to 119.1 in the month under review. Declines were shown in each of the three main classes considered in this connection. The slaughtering of hogs was 352,286 against 411,745 in July. The production of factory cheese showed a moderate gain after seasonal adjustment. The total was 28.1 million against 30.2 million in the preceding month. The index of creamery butter production rose from 108.1 to 111.4. Cheese grading results in the first nine months of the current season continued to show a high level of excellence, 92.48 p.c. being first grade. Production in the first eight months of the calendar year was 42 p.c. greater than in the same period of last year.

Operations in the Canadian newspaper industry were on a slightly heavier scale in August than in the preceding month but were still at a level below a year ago. During August mills operated at 68.4 p.c. of capacity to produce 253,239 tons as compared with, respectively, 65.2 p.c. and 241,178 tons in July and 80.2 p.c. and 293,054 tons for August last year. Shipments to the United States market were 3.3 p.c. less than a year ago, while exports to overseas markets declined 65.8 p.c. and domestic shipments were lower by 1 p.c. Statistics of United States newsprint consumption for August indicate a somewhat better trend than had been experienced for the preceding six months, the net reduction from a year ago being half of one percent, while the July-August expansion of 6 p.c. compares with a similar gain of a year ago of 4.3 p.c. The statistics of newspaper advertising in 52 cities recorded a continuance of the July improvement, the two-months total at 184.4 million lines being practically unchanged from a year ago against a drop of 9.9 p.c. for the six months period ended June 30. Owing to shortages of hydro electric energy and man-power, a policy of tonnage allocation of newsprint has been introduced. This plan has as its aim minimum dislocation of labour and maximum use of available power not required for direct war munitions manufacture. A reduction of newsprint production is needed in those areas where there is insufficient power available for production of direct raw materials. Manufactures

The manufacture of munitions recorded further expansion in August, the index of the output of this comprehensive group recording betterment over July. The release of tobacco reached a higher position in August, the June index advancing from 127.6 to 140.5. The release of cigarettes was 852.5 million against 843.6 million. As the advance was contraseasonal, the index moved up sharply. The release of cigars was practically maintained at 15,980,000 against 16,002,000. The release of Canadian raw-leaf rose from 266,000 pounds to 283,000. Marked increases were shown in the releases of cigars and cigarettes

over August of last year.

Railways Railway traffic was at a somewhat lower level in August than in the preceding month, the index dropping from 148 to 130. During the first thirty-seven weeks of the year there were loaded 2,353,000 cars compared with 2,193,000 in the same period of last year. The increase was more than 7 p.c. or 160,000 cars. A marked rise was shown in loadings of miscellaneous commodities mainly of a manufactured character. The increase in this division was more than 92,000 cars and other marked gains were recorded in ore, lumber, pulpwood and pulp and paper. The increase in coal was more than 16,000 cars and l.c.l. merchandise was greater by 11,000 cars. The main decline was shown in grain and grain products, the deficit amounting to nearly 27,000 cars.

The combined gross earnings of the Canadian National Railway and Canadian Pacific Railway companies for the first eight months of the year showed an increase of \$69.6 million or 20.9 p.c. over the same period of last year. The period's gross of \$402 million compared with \$332 million for the first eight months of 1941. The gain over the prosperous period of 1929 was 15.8 p.c. It was stated by the president of the Canadian National that the railways of the Dominion are in a position to handle all traffic which may be offered. The railways will be relieved to a great extent of the necessity of carrying the bumper grain crop since eastern elevators are already well filled.

Trade

Wholesale sales were 5 p.c. greater in July this year than in 1941. The index was 154·2 against 167·5 in June and 147·1 in July 1941. Sales during the first seven months were 15 p.c. greater than in the same period of last year. Retail sales of Canadian department stores during July 1942 were 10 p.c. greater than in the same month last year but declined 20 p.c. from June. Only 712 new passenger cars were sold during July, a decline of 89 p.c. from the same month of last year. The decline reflected the cessation of car building in Canada as auto plants turned to war production.

Over the first six months of the year, net sales of securities by Canada to foreign countries were considerably more than four times the total for the same period of 1941, an amount of \$57.7 million comparing with \$12.2 million in the same period of last year. Of this year's net sales, Canadian bonds amounted to \$53.8 million, including \$25.3 million in Dominion guaranteeds, Dominions

\$12.6 million and \$15.2 millions in provincial issues.

#### **Prices**

The cost of living index was 117.7 on August 1, against 117.9 one month earlier and 113.9 on the same date of last year. In a period of little over two years during the last war, the cost of living index increased from 100 in July of 1914 to 116.1 in October, 1916. During the corresponding period of the present war, the index increased from a base of 100 in 1939 to 114.6 in October, 1941. Approximately half of this increase occurred in the last six months of the period. Therefore, during a little more than the first two years of the two wars, the rise in the cost of living was approximately the same. During the nine months of October 1941 to July 1942, the index rose only 2.4 points. During the nine months of October 1916 to July 1917, the rise in the index was 18.2 points or nearly 8 times as much as during the corresponding period of the present war.

**Dominion Finance** 

Dominion government expenditures in August amounted to \$301.4 million against \$124.1 million in the same month last year. The largest item was war expenditure at \$173.4 million compared with \$98.9 million in the same month a year ago. Charges under the United Kingdom War Financing Act of 1942 amounted to \$100 million. Expenditures of the first five months of the current fiscal year were at \$1,699 million, nearly three times as much as in the same period of 1941 when \$563 million were expended. War expenditures of this period were \$839 million against \$408 million. The total allotments to the end of August under the United Kingdom Financing Act amounted to nearly \$649 million. Receipts for the first five months were \$906 million against \$591 million in the same period of 1941.

It was announced that Canada's third Victory Loan will be offered on October 9th, with an objective of \$750 million. The \$750 million objective is the highest of any of the five loans since the war began. The first was \$200 million, the second \$300 million, the third and fourth for \$600 million each.

The Finance Department announced on September 1, that an issue of Dominion of Canada deposit certificates amounting to \$40 million due March 2, 1943, has been sold to the chartered banks at par. The certificates will bear interest at the rate of  $\frac{\pi}{4}$  of 1 per cent per year.

## REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. XVII

OTTAWA, SEPTEMBRE 1942

Nº 9

STATISTICIEN DU DOMINION: S. A. CUDMORE, M.A. (OXON.), F.S.S., F.R.S.C. CHEF, BEANGHE DES STATISTIQUES ÉCONOMIQUES: SYDNEY B. SMITH, M.A.

#### SITUATION ÉCONOMIQUE EN AOÛT

Cinq des six facteurs traçant l'orientation de la situation économique demeurent relativement stables les huit premiers mois de l'année courante. L'exception est les dépôts aux banques à charte qui laissent voir une augmentation brusque les premiers mois de l'année, suivie d'une diminution. Les changements en août sont de peu d'importance; les facteurs spéculatifs et les prix de gros réagissent. Les opérations commerciales, les obligations de tout repos et les dépôts bancaires accusent de légers gains. Les actions ordinaires et les opérations spéculatives fluctuent maintenant bien au-dessous du niveau entre guerres. L'indice des obligations du Dominion est inférieur à ce niveau depuis le début de 1941. Les prix de gros, les opérations commerciales et les dépôts bancaires dépassent considérablement le niveau de cette période.

L'indice de l'emploiement révèle le niveau élevé des opérations productives au Canada. A date cette année l'augmentation est marquée en regard de 1941. Les indices ajustés pour la saison depuis le commencement de l'année ont été relativement stables, ce qui laisse supposer que les autres avances seront moins spectaculaires.

Les transactions par chèque sont un excellent indice de l'activité économique. Le volume augmente de 14·2 p.c. les huit premiers mois de l'année courante comparativement à la même période de 1941. On prévoit que le prochain emprunt fédéral déterminera une augmentation encore plus forte avant la fin de l'année. Les chèques encaissés en août se chiffrent à \$3,480,000,000 contre \$3,150,000,000 en août l'an dernier.

Il a récemment été annoncé que la cime de la production de guerre sera atteinte les premiers mois de l'année prochaine. La pénurie de matières premières est le plus grand problème de la production de guerre, tandis que le problème de la main-d'œuvre occupe le deuxième rang. La pénurie de matières premières est aigué et l'on entrevoit une violente diminution de la production pour besoins civils. Aux premiers stages de l'expansion industrielle de guerre du Canada, l'activité était considérable dans le bâtiment. La construction de stations aériennes pour le Plan d'Entraînement Aérien du Commonwealth est maintenant à peu près terminée et la construction industrielle a également dépassé son maximum.

#### Agriculture

Le revenu agricole en espèces est estimé à environ \$399,000,000 le premier semestre de 1941, soit une augmentation considérable en regard de toute période comparable depuis le début de la guerre. Le plus fort pourcentage du revenu agricole en espèces est ordinairement touché au cours du dernier semestre de l'année, alors que les livraisons de grain et de bestiaux sont les plus volumineuses. On peut s'attendre encore que les rendements de grain sans précédent cette année et qu'une nouvelle expansion de la production de bestiaux joueront un rôle important au cours du dernier semestre. Cependant, le revenu provenant de la vente du blé dépendra largement du volume des livraisons qu'il sera possible de faire à la lumière de la crise de l'entreposage. Le revenu en espèces est placé à \$399,000,000 les six premiers mois de l'année courante, à rapprocher de \$343,000,000 en 1941 et environ \$259,000,000 en 1940.

La production globale de blé au Canada en 1942 est placée à un niveau sans précédent de 615,000,000 de boisseaux. Ce total est près de deux fois la production de 311,800,000 boisseaux en 1941 et excède de 48,500,000 boisseaux la récolte record de 566,700,000 boisseaux en 1928. Les approvisionnements de grain fourrager dans l'ensemble du Canada sont maintenant les plus volumineux dans l'histoire, grâce à une production sans précédent d'avoine et d'orge accompagnée de la récolte la plus abondante de blé. Prenant les Provinces des Prairies comme ensemble, la récolte de blé est la plus considérable dans l'histoire, tant en rendement qu'en production. Le rendement moyen est estimé à 28-4 boisseaux comparativement au record antérieur de 26 boisseaux en 1915. La production de 1942, estimée à 587,000,000 de boisseaux, surpasse de 42,400,000 boisseaux le record antérieur de 544,600,000 boisseaux en 1928.

Les stocks de blé en magasin s'établissent à 399,800,000 boisseaux la semaine du 11 septembre en regard de 471,200,000 boisseaux la même semaine de l'an dernier. Les arrivages dans les troi, Provinces des Prairies se placent à 8,500,000 boisseaux au cours des six semaines terminées les 11 septembre, à rapprocher de 31,200,000 la même période de 1941.

L'indice des arrivages de bestiaux passe de 93.4 en juillet à 102.9 en août. Les ventes de bêtes à cornes et de veaux augmentent, tandis que celles de porcs et de moutons diminuent après ajustement saisonnier. Les stocks des entrepôts frigorifiques au commencement d'août sont moins considérables que ceux du mois précédent. L'indice s'établit à 129.8 contre 137.3. L'indice des abatages inspectés recule de 140.4 à 119.1 le mois sous revue. Il y a des déclins pour chacune des trois principales catégories. Les abatages de porcs se chiffrent à 352,286 têtes comparativement à 411,745 en juillet. La production de fromage de fabrique accuse une augmentation modérée après ajustement saisonnier, soit 28,100,000 livres comparativement à 30,200,000 le mois précédent. L'indice de la production de beurre de crémerie avance de 108.1 à 111.4. Les résultats du classement du fromage durant les neuf premiers mois de la campagne courante continuent de manifester un degré élevé d'excellence, 92.48 p.c. de la production étant de la première qualité. La production des huit premiers mois de l'année civile excède de 42 p.c. celle de la même période de l'an dernier.

#### Industrie forestière

Les opérations de l'industrie canadienne du papier à journal en août sont un peu plus considérables que le mois précédent, mais elles sont encore inférieures à celles de l'an dernier. En août les papeteries fonctionnent à 68.4 p.c. de leur capacité et produisent 253,239 tonnes, à rapprocher de 65 · 2 p.c. et 241,178 tonnes respectivement en juillet et 80 · 2 p.c. et 293,054 tonnes en août l'an dernier. Les expéditions aux Etats-Unis sont inférieures de 3.3 p.c. à celles de l'an dernier, tandis que les exportations sur les marchés d'outre-mer déclinent de 65 · 8 p.c. et les expéditions domestiques diminuent de 1 p.c. Les statistiques de la consommation de papier à journal aux Etats-Unis indiquent que la tendance est un peu meilleure en août que durant le semestre précédent, la diminution nette en regard de l'an dernier étant moins de la moitié d'un pour cent, tandis que l'augmentation de 6 p.c. de juillet à août se compare à celle de 4-3 p.c. l'an dernier. Les statistiques des annonces dans les journaux en 52 villes indiquent que l'amélioration de juillet se continue; le total de 184,400,000 lignes au cours des deux mois n'offre à peu près pas de changement comparativement à l'an dernier, tandis que durant la période semestrielle terminée le 30 juin il décline de 9.9 p.c. En raison de la pénurie d'énergie électrique et de main-d'œuvre, une politique de répartition du tonnage de papier à journal a été introduite. Ce programme a pour but la désorganisation minimum de la main-d'œuvre et l'utilisation maximum d'énergie disponible qui n'est pas directement requise pour la fabrication des munitions. La diminution de la production de papier à journal est nécessaire dans les régions où l'énergie ne suffit pas à la production des matières premières.

#### Manufactures

La production de munitions prend une nouvelle expansion en août et l'indice de ce vaste groupe accuse une avance sur juillet. Les dédouanements de tabac atteignent un niveau plus élevé en août et l'indice de juin avance de 127-6 à 140-5. Les dédouanements de cigarettes se chiffrent à 852,500,000 contre 843,600,000. Comme cette augmentation est hors de saison, l'indice grimpe brusquement. Les dédouanements de cigares se maintiennent à peu près au même point, soit à 15,980,000 contre 16,002,000. Les dédouanements de tabac brut canadien passent de 266,000 livres à 283,000. Les dédouanements de cigares et de cigarettes laissent voir une augmentation marquée comparativement à août l'an dernier.

#### Chemins de fer

En août le trafic ferroviaire est un peu moins considérable que le mois précédent, l'indice reculant de 148 à 130. Durant les trente-sept premières semaines de l'année les chargements se chiffrent à 2,353,000 wagons, à rapprocher de 2,193,000 la même période de l'an dernier, augmentation de 160,000 wagons ou de plus de 7 p.c. Il y a une augmentation marquée des chargements de denrées diverses, qui sont des produits ouvrés pour la plupart. L'augmentation en ce groupe excède 92,000 wagons; il y a également des augmentations marquées pour le minerai, le bois d'œuvre, le bois à pulpe, la pulpe et le papier. Les chargements de charbon augmentent de plus de 16,000 wagons et ceux de marchandises par lots de moins d'un wagon, de plus de 11,000 wagons. La principale diminution est celle des chargements de grain et de produits du grain, qui s'élève à près de 27,000 wagons.

Les recettes brutes du Canadien National et du Pacifique Canadien au cours des huit premiers mois de l'année laissent voir une augmentation de \$69,600,000 ou de 20.9 p.c. comparativement à la même période de l'an dernier. Les recettes brutes de cette période se chiffrent à \$402,000,000. en regard de \$332,000,000 les huit premiers mois de 1941. L'augmentation comparativement à la période prospère de 1929 est de 15-8 p.c. Le président du Canadien National a déclaré que les chemins de fer du Dominion sont en mesure de disposer de tout le trafic qui peut se présenter. Les chemins de fer seront déchargés dans une grande mesure de la nécessité de transporter la récolte très abondante de grain, puisque les élévateurs de l'Est sont déjà bien remplis.

#### Commerce

En juillet cette année les ventes de gros excèdent de 5 p.c. celles de juillet 1941. L'indice se place à 154.2, à rapprocher de 167.5 en juin et 147.1 en juillet 1941. Les ventes durant les sept premiers mois dépassent de 15 p.c. celles de la même période de l'an dernier. Les ventes des magasins à rayons au Canada sont de 10 p.c. plus considérables en juillet qu'au cours du même mois de l'an dernier, mais elles déclinent de 20 p.c. en regard de celles de juin. En juillet il ne se vend que 712 voitures neuves de tourisme, diminution de 89 p.c. par rapport au même mois de l'an dernier. Ce déclin reflète la cessation de la fabrication des automobiles au Canada, car les fabriques s'adonnent à la production de guerre.

Pendant le premier semestre de l'année les ventes nettes de valeurs mobilières canadiennes aux pays étrangers excèdent de plus de quatre fois celles de la même période de 1941; elles se chiffrent à \$57,700,000 contre \$12,200,000. Les obligations canadiennes représentent \$53,800,000 des ventes nettes de cette année, y compris \$25,300,000 d'obligations garanties par le Dominion, \$12,600,000 d'obligations fédérales et \$15,200,000 d'obligations provinciales.

#### Prix

L'indice du coût de la vie s'établit à 117.7 le 1er août, en regard de 117.9 le mois précédent et 113.9 la même date de l'an dernier. Pendant un peu plus de deux ans au cours de la dernière guerre, l'indice du coût de la vie est passé de 100 en juillet 1914 à 116·1 en octobre 1916. Pendant la période correspondante de la guerre actuelle, l'indice a avancé de la base 100 en 1939 à 114.6 en octobre 1941. Environ la moitié de cette avance s'est produite pendant les six derniers mois de la période. Ainsi donc, durant un peu plus des deux premières années des deux guerres, la hausse du coût de la vie a été à peu près la même. Au cours des neuf mois d'octobre 1941 à juillet 1942, l'indice n'a gagné que 2·4 points. Durant les neuf mois d'octobre 1916 à juillet 1917, l'indice a gagné 18·2 points ou près de 8 fois autant que pendant la période correspondante de la guerre actuelle.

#### Finances fédérales

Les dépenses du Gouvernement fédéral se chiffrent à \$301,400,000 en août, à rapprocher de \$124,100,000 le même mois de l'an dernier. L'item le plus considérable est la dépense de guerre, \$173,400,000 contre \$98,900,000 le même mois de l'an dernier. Les dépenses en vertu de la loi du financement de la guerre du Royaume-Uni s'élèvent à \$100,000,000. Les dépenses des cinq premiers mois de guerre de l'année fiscale courante s'établissent à \$1,699,000,000, près de trois fois celles de \$563,000,000 la même période de 1941. Les dépenses de guerre de cette période se placent à \$839,000,000 contre \$408,000,000. Les affectations de fonds en vertu de la loi du financement de la guerre du Royaume-Uni se chiffrent à près de \$649,000,000 à la fin d'août. Les recettes au cours des cinq premiers mois s'élèvent à \$906,000,000 comparativement à \$591,000,000 la même période de 1941.

Il a été annoncé que le troisième emprunt canadien de la victoire sera lancé le 9 octobre; l'objectif est de \$750,000,000. Cet objectif est le plus élevé de chacun des cinq emprunts depuis le début de la guerre. Le premier était de \$200,000,000; le deuxième, de \$300,000,000; le troisième et le quatrième, de \$600,000,000 chacun.

Le Ministère des Finances a annoncé le 1er septembre qu'une émission de certificats de dépôts du Dominion du Canada, s'élevant à \$40,000,000 et échéant le 2 mars 1943, a été vendue au pair aux banques à charte. Les certificats porteront intérêt au taux de 4 de 1 p.c. par année.

BUREAU FÉDÉRAL DE LA STATISTIQUE, 30 septembre 1942.

#### PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS

#### PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS, DURING THE MONTH ENDED SEPTEMBER 16, 1942

Construction.-Preliminary report on the construction industry in Canada, 1941, 27 p., 25 cents.

Population.—Population No. A-1 Prince Edward Island, rural and urban sub-divisions (Eng. and French), 2 p., 10 cents. Population No. A-1, Nova Scotia, rural and urban sub-divisions (Eng. and French) 8 p., 10 cents. Population No. A-4, Prince Edward Island, Racial Origin (Eng. and French), 4 p. Population No. A-5, Prince Edward Island, Religion, 4 p. Reserve of Labour among Canadian women, 10 p. 10 cents. Statistical report on the operation of the Unemployment Insurance Act (compiled from material supplied by the Unemployment Insurance Commission) February to June, 1942, 13 p., map, 25 cents.

Production.—Agricultural Products—Census of Agriculture, Bulletin No. 24, Prince Edward Island; Number and value of livestock on farms, June 1, 1941 (Eng. and French), 2 p. Bulletin No. 25, Manitoba; Number and value of livestock on farms, June 1, 1941 (Eng. and French), 8 p. Bulletin No. 26, Ontario; Number and value of livestock on farms, June 1, 1941 (Eng. and French), 8 p. Bulletin No. 27, New Brunswick: Number and value of livestock on farms, June 1, 1941 (Eng. and French), 8 p. Bulletin No. 28, British Columbia: Number and value of livestock on farms, June 1, 1941 (Eng. and French), 6 p. Telegraphic crop report, August 18, 1942, 8 p., \$2 per year (Eng. and French). Fruit and vegetable crop report, August 29, 1942, 4 p., \$1 per year. Cash income from the sale of farm products, January to June, 1940 to 1942, 6 p., 10 cents. Carry-over stocks of Canadian grain at July 31, 1942, \$2 per year, 1 p. The grain situation in Argentina, August 14, 1942, 4 p., \$1 per year. Canadian coarse grains, quarterly review, August 14, 1942, V. 1 No. 4, \$1 per year. Animal Production—Advance report on the fisheries of Ontario, the Prairie Provinces and Yukon, 1941, 15 p., 10 cents. Report on the fur farms of Canada 1940 (Eng. and French), 53 p., 25 cents.

Manufactures.—Manufacturing industries of the Maritime Provinces, 1940, 28 p., 25 cents. Forest Products—Preliminary report on the pulp and paper industry in Canada, 1941 (Eng. and French), 21 p., 30 cents.

Internal Trade.—World price movements (First half of 1942), 10 p., 25 cents. Summary of monthly indexes of retail sales on Canada, 1929-1941, revised base, average 1935-9=100, 26 p., 25 cents.

Education.—Elementary and secondary education in Canada, 1938-40 (being Part I of the Biennial Survey of Education in Canada, 1938-1940), 129 p., bibl., 50 cents.

#### 2. PUBLICATIONS REGULARLY ISSUED BY THE WEEK, MONTH OR QUARTER

Daily Bulletins.—The daily bulletin (Eng. and French)-\$1.50 per year.

Weekly Bulletins.—Canadian grain statistics. Carloadings of revenue freight. The weekly bulletin—\$1.00 per year.

Monthly Bulletins.—Advance preliminary statement, stocks of butter, cheese and eggs in the principal cities of Canada. Agricultural statistics (Eng. and French) Asbestos trade. Automobile financing. Building permits. Canada's imports by principal countries. Canadian milling statistics. Canal Statistics. Cold storage holdings of fish. Cold storage holdings of meat and lard. Commercial failures. Current trends in food distribution. Current review of agricultural conditions. Departmental store sales. The employment situation as reported by employers. Footwear trade. Monthly retail sales in country general stores. Monthly wholesale trade. New motor vehicle sales. Output of central electric stations in Canada. Outstanding facts and figures gathered from reports, statements, bulletins and radio broadcasts. Price movements (preliminary). Prices and price indexes. Railway operating statistics. Registration of births, deaths and marriages.—\$1.00 per year. Retail sales in Canada. Review of dairy production. Sales and purchases of securities between Canada and other countries. Steel ingots. Stocks of Canadian fruit and vegetables. Stocks of dairy and poultry products. Stocks of raw hides and skins. Summary of Canada's domestic exports. Summary of Canada's imports. Summary of the trade of Canada, current month and 12 months. Tobacco trade. Traffic of Canadian Railways. The wheat situation; review, statistical supplement—\$1.00 per year.

Monthly Review of Business Statistics (Eng. and French)—Price \$1.00 per year. Economic Conditions. Bank debits.

Quarterly Bulletins.—Canadian coarse grains. Civil Aviation. Quarterly bulletin of agricultural statistics. Price \$1.00 per year.

For the publications listed above application should be made to the Dominion Statistician, Dominion Bureau of Statistics, Ottawa.

The complete service of all publications issued by the Bureau (with the exception of news bulletins) may be obtained for a special rate of \$30 per annum.
